Directions

1. Identify a target activity.
2. List the steps of the activity.
3. Observe non-disabled peers of average/typical ability performing this activity. Rate the peer's level of independence in each step of the activity.
4. Observe the target individual performing this activity. Rate his/her level of independence in each step of the activity.
5. Indicate whether a discrepancy exists between peer and target individual's participation.
6. Based on your observations and impressions, indicate the types of barrier(s) which seem to inhibit participation.
